PROFESSIONAL SUMMARY

Tech for impact CS graduate working at the intersection of AI, Cybersecurity, and Social Impact, building LLM-based privacy tools, STEM outreach initiatives that support underrepresented communities.

EDUCATION

Bachelor of Science in Computer Science **2026**
California State University San Bernardino San Bernardino, California

WORK EXPERIENCE

Tech Associate (Volunteer) **March 2026 – June 2026**
Polilit San Bernardino, California

- Developed data acquisition pipelines handling thousands of documents, providing technical consultations and making visualization for key stakeholders

AI security research intern **June 2025 – August 2025**
The ACTION NSF Artificial Intelligence Institute UC Santa Barbara Santa Barbara, California

- Developed RedactBench: the first framework for automated LLM-based redactions and synthetic document generation pipeline
- Poster presentation at UC Santa Barbara 2025 summer undergraduate research colloquium reaching over 200 attendees
- Awarded 1st place for research poster presentation at CSUSB's 15th meeting of the minds, competing in poster group 59b–62b

Project Manager **June 2025 – August 2025**
Ride Splits San Bernardino, California

- Coordinated team onboarding and project workflows while implementing an AI chatbot feature to improve platform functionality and user support.
- Innovated a smart commuting social platform aimed at solving transportation infrastructure problems in my community using technology and placed 3rd in Introducing Youth to American Infrastructure (iyai+) international innovation challenge

Emerging Technology, Innovation, and partnerships (ETIPS) Fellow **March 2025 – May 2025**
California State University San Bernardino San Bernardino, California

- Completed hands-on workshops in AI, machine learning, quantum computing, and semiconductor technologies using Jupyter, Google colab, cloud notebooks, and high-performance computing resources.

Awards and Certificates

McKinsey Forward Program - In Progress | AWS Certified Cloud Practitioner - In Progress
USCC Cyber Boot Camp Certification of Completion – 2026 | Claude 101 – 2026
HACU career readiness certification - 2026 | AAAI (academic applications of AI) - 2025
HSF (Hispanic scholarship fund) - finalist – 2025
HACU (Hispanic association of colleges and universities) scholarship - 1 out of 20 at CSUSB – 2024
GSEC (GIAC security essentials) - 2024 | GFACT (GIAC foundational cybersecurity technologies) - 2023
CyberStart America national cyber scholar - (top 1000 out of 45,962) - 2022

PROJECTS

Fontana Aware | Astro, TypeScript, JavaScript, CSS, Decap CMS, Cloudflare Workers

- Built a responsive bilingual community portal centralizing city meeting information, traffic cameras, public data, local broadcasts, weather, air quality, and community organizations for Fontana residents.
- Open-sourced a template to enable cities to cheaply deploy civic tech in their local community with no code content management system interface.

Pitstop Notes | TypeScript, React, Next.js, OpenAI , Supabase, Clerk

- Built a full-stack study platform that converts handwritten note images into editable Cornell notes, AI-generated summaries, review questions and spaced-repetition scheduling.
- Implemented authenticated note storage and per-user daily usage limits to control AI API consumption.

SkillsUSA 2026 California State Competition | Cyber Security

- Created 8 unique cybersecurity challenges in cryptography, steganography, and password cracking

Distributed Computing Contributor | Folding At Home (F@H)

- Built a custom Linux pc for reliable long-term usage with high GPU utilization while maintaining temperature in mid-70's under load earning 39 million points, completing 1500 work units, ranking 75k out of 3M+ ranked donors supporting large scale biomedical and disease research

California Disadvantaged Communities (DAC) classifier | Python

- Cleaned original dataset of over 2k communities implementing support vector machine and random forest classifier with approximately 90% accuracy

TECHNICAL SKILLS

Languages | Python, Java, C++, R, HTML, CSS,
Developer Tools | GitHub, Visual Studio Code, Cursor, Claude, ChatGPT, AWS, Cloudflare, Supabase, Clerk
Cyber | VMware, VirtualBox, Linux, Wireshark, CyberChef, Ophcrack, CrackStation, HashCat, Exiftool
Libraries | Tailwind, OpenAI, Mimesis, Faker, React, Astro, Decap

Affiliations and Leadership

Cyber Intelligence and Security Organization (CISO)| Member | **February 2025 – May 2026**

- Competed in National Cyber League (NCL), achieving Diamond Division (Top 100) in team games and Gold Division individually.
- Participated in hands-on penetration testing (DogPark), web exploitation, and CTF exercises.

Computer Science and Engineering Club | Outreach Officer | **August 2025 – May 2026**

- Presented workshops on distributed computing, virtual machines + bootable usbs, and e-waste + repurposing tech
- CSUSB hackathon winner by scoring the most points and completing the most hacker rank problems during the competition

JumpStart into Cyber (JIC) NSF funded program | Participant | **2023 – 2024**

- Sec275: foundations: computers, technology, & security and Sec401: security essentials - network, endpoint, and cloud learned about Linux, virtual machines, and cyber security concepts
